Avi Lindenbaum avi.lindenbaum@agileview.ai CEO 9175132472		N/A	
Web Address		CAGE Code	
www.agileview.ai		9GT13	
Capabilities			
<p>Our offerings solve a crucial bottleneck in the deployment and sustainment of object detection ML algorithms – procuring and labeling training geospatial imagery data.</p> <p>We create highly scalable machine-generated (synthetic) virtual data sets for training object detection algorithms. The platform was purpose-built for geospatial analytics to accelerate the deployment of object detection algorithms for commercial and government customers. We automate much of the process of gathering and preparing the datasets for training enabling customers to deploy in a faster, better, and less expensive manner than using real data alone. Customers can generate limitless geospatial image datasets for any object in any environment that enables algorithm training within weeks instead of months to 1 year.</p> <p>Our tools allow for customized synthetic geospatial imagery offering total control over the image creation process resulting in datasets that are fully annotated and training ready. Feedback loops and other measurement capabilities support experimentation and iteration capabilities at scale.</p> <p>Our market-proven synthetic data offerings can support the warfighter and analysts in deploying trusted AI / ML models for automated image analysis, object detection, and change detection as part of work leveraging satellite and UAS (drone) imagery. Our product roadmap calls for future capabilities leveraging additional phenomenology to include SAR, IR, and RF data types. Our team has a deep history of proudly supporting the U.S. defense and intelligence community as well as commercial markets.</p>

## 32. Airwai

<b>POC 1</b>	<b>POC 2</b>
Nick Smith nick@airwai.co VP Sales 7602747771	N/A
<b>Web Address</b>	<b>CAGE Code</b>
www.airwai.com	07Z17
<b>Capabilities</b>	
<p>Vehicle-Agnostic Flexibility: SOF units operate diverse vehicle fleets (HMMWVs, MRZRs, civilian trucks in covert ops). The PhantomRig's modular design mounts on any vehicle, reducing logistics and training burdens.</p> <p>Multi-Modal Sensing: EO/IR, LiDAR, radar, acoustic, RF for infrastructure/airfield condition monitoring</p>	

Real-Time Threat Recognition: ML models trained on cluttered, low-SNR data to detect humans, vehicles, UxS, UXO, CBRNE, etc.

3D Mapping and Obstacle Detection: Supports airfield conditions assessment, route planning, UXO avoidance,

SLAM-Based Navigation: Operates in GNSS-denied terrain

GIS Integration for Situational Awareness

Autonomous Tasking: AI interprets operator intent or spoken commands (LBM support)

Data Pipeline Ready/Edge Computing: Outputs geo-referenced detections, classifications, and confidence metrics in real time

SaaS Analytics for Long-Term Planning: The cloud-based platform provides trend analysis (e.g., pavement wear, recurring FOD patterns), aiding SOF logistics in maintaining airfields over extended deployments. This is valuable for sustained operations in remote theaters.

Customers

1. USSOCOM Component Commands (AFSOC, NSWC, MARSOC, JSOC)

Air Force Special Operations Command (AFSOC):

Needs: AFSOC operates in austere airfields for special operations missions (e.g., MC-130s, CV-22 Ospreys). These airfields require rapid assessment for usability (pavement condition, FOD risks) to ensure safe takeoffs/landings, often under time pressure or contested conditions. AFSOC units like the 1st Special Operations Wing or 27th Special Operations Wing need tools to evaluate and maintain expeditionary runways without extensive manpower.

PhantomRig Fit: The PhantomRig can be mounted on AFSOC vehicles (e.g., tactical trucks or UTVs) to scan runways for FOD, cracks, or subsurface issues (via GPR). Its AI-driven analytics provide instant usability reports, critical for missions where airfields are seized or temporarily used. The system’s GIS integration (e.g., with ESRI ArcGIS) supports AFSOC’s need for real-time mapping and data sharing with joint forces. The rig’s lightweight, modular design is ideal for air-transportable SOF kits.

2. SOF Support Units (Logistics, Engineers, and Aviation)

Special Operations Aviation Units (e.g., 160th SOAR):

Needs: The 160th Special Operations Aviation Regiment operates in challenging environments, requiring airfields to be assessed and maintained for MH-60, MH-47, or A/MH-6 operations. They need tools to ensure runway safety and rapid setup.

PhantomRig Fit: The PhantomRig can be integrated into the 160th’s ground support vehicles to scan landing zones for hazards, ensuring safe rotorcraft operations. Its real-time data supports quick go/no-go decisions, and its GIS integration aids mission planning. The system’s ability to operate in low-visibility conditions (via thermal/EO/IR) is a key enabler for night ops.

3. SOF Engineers (e.g., AFSOC Civil Engineers, Army Special Forces Engineers):

Needs: SOF engineers assess and repair airfields in forward locations, often under time constraints. They need tools to evaluate pavement condition, detect subsurface issues, and ensure operational readiness.

PhantomRig Fit: The PhantomRig’s GPR and LiDAR enable engineers to map pavement conditions and detect subsurface voids or damage, critical for expeditionary runway repairs. Its vehicle-agnostic design allows use on engineering vehicles (e.g., construction trucks), reducing equipment needs. The AI-driven analytics provide prioritized repair recommendations, streamlining workflows.

4. SOF Logistics and Base Operations:

Needs: SOF logistics units manage FOBs and contingency airfields, requiring tools for sustained infrastructure monitoring, security, and compliance with safety standards (e.g., Part 139-like requirements for joint-use airfields).

PhantomRig Fit: The PhantomRig can be mounted on base ops vehicles to perform daily inspections, FOD sweeps, and perimeter patrols, reducing manpower demands. Its SaaS analytics platform provides long-term trend data (e.g., pavement degradation), aiding maintenance planning. The system’s integration with ESRI ArcGIS supports base-wide situational awareness.

5. Joint and Allied SOF Partners

Joint Task Forces (JTFs) and Combined Joint Special Operations Task Forces (CJSOTF):

Needs: JTFs and CJSOTFs coordinate multi-service SOF missions, often in coalition environments. They require interoperable, scalable tools for airfield management and force protection across diverse theaters.

PhantomRig Fit: The PhantomRig’s modular design and GIS compatibility make it ideal for joint operations, allowing data sharing across U.S. and allied SOF units. Its ability to operate on various vehicles ensures flexibility in coalition settings. The system’s AI-driven hazard detection supports rapid airfield setup and sustained operations.

<b>Capabilities</b>			
<p>Aptima, Inc. is a small business specializing in human-centered engineering, helping the Department of Defense (DoD) research and analyze complex problems and design and develop efficient methodologies, systems and software applications that measurably improve human performance. We apply deep expertise in how humans think, learn, and behave to the goal of advancing readiness. By combining measurement with learning data analytics and AI/ML-based personalized adaptive training, our tools provide a successive cycle to measure, analyze, understand, and optimize human performance. Headquartered in Woburn, MA, the company also maintains offices in Arlington, VA, Dayton, OH, and Orlando, FL. Aptima has been appraised at Level 3 of the CMMI Institute's Capability Maturity Model Integration (CMMI)®. Aptima's capabilities and solutions produce measurable results because we base our designs on a scientific understanding of human performance in the workplace. By combining the principles of social science with quantitative computational methods, we deliver innovative products and services to measure, analyze, augment, and improve performance for individuals and teams.</p>

<b>POC 1</b>	<b>POC 2</b>
Bradford Morse b.morse@archangel.im Vice President 315-480-3172	Dan Sola d.sola@archangel.im CEO 680-214-3030
<b>Web Address</b>	<b>CAGE Code</b>
www.archangel.im	9RW53
<b>Capabilities</b>	

We have optimized our technology to support warfighters in attention-saturated, infrastructure-poor conditions.

Our Xnaut AI copilots support UXV platforms with dynamic, goals-based & priority-based mission execution, even when the situation has dramatically changed. The strongest customer pull has been for GPS-denied navigation, which we developed as a foundational layer of intelligence to support future mission autonomy (it's hard to pursue a goal when you don't know where you are). Xnaut uses an ensemble approach, with 52+ navigation methods tracked internally. The more mature methods are already integrated into V1: test-flown at in UK, US, and Spain and being delivered to customers this year.

Our Argonaut AI camera technology addresses a critical gap in force protection for Security Forces and isolated small units. The current manual process of securing perimeters and responding to threats imposes high risk and strain on warfighters. Our integrated system utilizes cutting-edge AI algorithms running off-grid on unattended ground cameras to deliver precise alerts and prompt response options. Argonaut can distinguish people, vehicles, specific objects, animals and other noise. The system has a proven world-leading false positive rate (4 per billion under extended civil commercial deployments to prevent suicide on the railways) and still works in fully RF-denied environments. We are progressing a small batch manufacturing line for the product and have support from civil police, USAF, local political representatives and industry primes, keen to deploy Argonaut as part of an integrated force protection or deployable ISR capability. Argonaut is compatible with ATAK, developed at and supported from Rome NY.

<b>Capabilities</b>	
CDW is a leading multi-brand technology solutions provider to business, government, education and healthcare organizations in the United States, the United Kingdom, and Canada. A Fortune 500 company with multi-national capabilities, CDW was founded in 1984 and employed approximately 15,000 coworkers. We have an expansive network of offices near major cities and a large team of field coworkers across the United States.	

Our broad array of offerings range from discrete hardware and software products to integrated IT solutions such as mobility, security, data center optimization, cloud computing, virtualization and collaboration. We are technology neutral, with a product portfolio that includes more than 100,000 products from more than 1,000 brands. We provide our products and solutions through our sales and service delivery teams, consisting of nearly 6,000 customer-facing coworkers, including more than 2,000 field sellers, highly skilled technology specialists and advanced service delivery engineers.

## 128. CHRONOS AI INC.

POC 1	POC 2
MARCO GANOUNA MARCO@CHRONOS.COM CEO 3107484484	N/A
Web Address	CAGE Code
WWW.CHRONOS.COM	9N5W9
Capabilities	
<p>Chronos AI Inc. Precision Geolocation &amp; Communications in GPS-Denied Environments</p> <p>Core Competencies Chronos AI is a dual-use technology company specializing in real-time 3D location tracking, navigation, and mesh communication without reliance on GPS, cell towers, or external infrastructure. Our proprietary PNC (Position, Navigation, Communication) platform enables live movement tracking of personnel, vehicles, and equipment—indoors, outdoors, and underground—with sub-meter accuracy and ultra-low latency.</p> <p>Key Capabilities:</p> <p>Live Movement Tracking: Sub-1 meter, 10Hz updates of people/assets using active RF tags and</p>	

anchors.

- ? Drone-Based Mesh Anchors: Mobile anchor network deployable in 60 seconds; ideal for austere environments.
- ? GPS-Denied Operations: Works without GNSS or cellular signals; resilient to jamming/spoofing.
- ? Auto-Calibrating Mesh Network: Self-healing, decentralized, and real-time adaptive coverage.
- ? Passive RF Detection (in development): Detects LTE, 5G, and other emitters without cooperation.
- ? Advanced Protocols: Supports TWR, TDoA, AoA, and AI-based multilateration.
- ? Edge-Based Processing: Works offline using portable compute hubs—ideal for tactical ops.
- ? Military-Grade Situational Awareness: 3D visualization and mission coordination via Chronos xS-tudio.

Differentiators

Only system deployable on drones for mobile, self-forming tracking networks.

Sub-meter accuracy in GPS-denied areas—indoors, underground, dense urban.

DoD-ready mesh comms + real-time geolocation without fixed infrastructure.

Visual Command UI (Chronos xStudio) with live playback, 3D awareness, and AI analytics.

Extensible IoT platform: Integrates with soldier vitals, vehicles, RF detection, and more.

Capabilities			
R & D in two main practice areas: 1) Comprehensive Biosignal & Behavior Research. Here we use best practices in signal processing, statistical modeling, and artificial intelligence/machine learning to analyze complex datasets with all varieties of biosignals (e.g., EEG, ECG, EMG, PPG, eye-tracking) and real-world behaviors 2) Medical & Performance System Development. By combining our expertise in human signal analysis and systems engineering, we develop software and device prototypes that close the loop between humans and multiple types of complex systems.

Capabilities			
<p>Our innovative passive cooling wearable (currently available as an adhesive patch or integrated into clothing) is engineered to provide reliable and efficient temperature regulation for up to 8 hours with a single use. Designed to recharge effortlessly in 30 minutes with just ounces of water, it offers a solution that can thrive in austere environments with contested logistics. The wearable is reusable for up to a month without the need for electricity or refrigeration, ensuring cost-effectiveness and sustainability. Adaptable to multiple form factors, it caters to diverse applications, including high-end athletes, elite military personnel, and worker safety environments. This addresses a critical need for risk mitigation in training and operations in extreme heat environments.</p>

## 209. Frontline Accouting & HR Solutions, LLC

POC 1	POC 2
Steven Dzibinski s.dzibinski@swflfrontline.com COO/CFO 2394606137	N/A
Web Address	CAGE Code
www.swflfrontline.com	08S72
Capabilities	
WFL Frontline Account and HR Solutions offers a comprehensive suite of services designed to support small to mid-sized businesses, nonprofits, government entities, and veteran-owned enterprises. Our accounting and financial management capabilities include accurate bookkeeping, payroll processing, financial statement preparation, and budgeting to provide clients with a clear financial picture and informed decision-making support. In human resources, we assist with policy development, recruit-	

ment, onboarding, employee records management, and benefits administration to foster a compliant and productive workforce. Our business consulting services help clients improve operational efficiency through strategic planning, process optimization, and grant application support, including detailed budget preparation. We also provide specialized services for government entities and nonprofits, offering expertise in grant management, compliance, and financial reporting for publicly funded projects. As a veteran-focused organization, we take pride in supporting veteran-owned businesses and community-driven initiatives, providing tailored guidance for programs like the VSTAGP and other grant opportunities. Our mission is to deliver personalized, reliable, and results-driven solutions that empower organizations to achieve sustainable growth and success.

Customers

SWFL Frontline Account and HR Solutions is actively seeking to partner with small to mid-sized businesses, nonprofits, government entities, and veteran-owned enterprises that require reliable, customized support in accounting, human resources, and business operations. Our ideal clients are growth-focused organizations looking to streamline financial processes, enhance HR management, and improve overall operational efficiency. We specialize in working with companies that value personalized, hands-on assistance to navigate the complexities of payroll, bookkeeping, compliance, and workforce development. Our commitment is to deliver tailored solutions that empower businesses to focus on their core mission while ensuring financial clarity and HR excellence. Veteran-owned, government, and community-driven organizations are especially welcome, as we take pride in supporting those who serve our country and communities.

## 221. Govly

POC 1		POC 2	
Anna Ying anna@govly.com		N/A	
Web Address		CAGE Code	
https://govly.com		9W2R6	
Capabilities			
<p>Govly is revolutionizing how public sector sales teams navigate the complex world of government procurement. At its core, Govly provides unparalleled visibility into the entire landscape of private contract vehicles like GWACs and IDIQs, enabling primes, OEMs, and resellers to discover millions of opportunities.</p> <p>Furthermore, we are prototyping AI-powered solutions to modernize and streamline procurement package development, which currently relies on manual, time-consuming processes. Traditional methods often lead to inefficiencies, inconsistencies, and a lack of expert guidance, especially when drafting documents like contracts, RFPs, and amendments. The absence of standardized templates and centralized support further complicates the process and delays mission-critical work. Our tools can automate document generation, improve compliance, and enhance decision-making. The envisioned solutions should use natural language processing and machine learning to create customizable templates, identify key clauses, and offer intelligent guidance. Ultimately, we hope to transform procurement workflows and elevate operational effectiveness across the Department of Defense and beyond.</p>

Web Address	CAGE Code
www.hyperblox.io	9BWM0
Capabilities	
<ul style="list-style-type: none"> <li>• Problem: Customers across industries are struggling to achieve their desired outcomes, resulting in lost opportunities, decreased efficiency, and unmet potential: <ul style="list-style-type: none"> <li>– This widespread challenge signals a critical need for a more effective and adaptable solution.</li> </ul> </li> <li>• Solution: HyperBlox framework is designed to help you solve a variety of challenges and unlock the full potential of your use cases, especially in Military applications: <ul style="list-style-type: none"> <li>– Personnel sensing, situational awareness</li> <li>– Computer vision / Video analytics</li> <li>– Remote and/or unmanned operations</li> <li>– Logistics, facilities management</li> <li>– Autonomous systems with Connected sensors/devices (IoT)</li> </ul> </li> <li>• Objective: We offer a set of tools that allows you to: <ul style="list-style-type: none"> <li>– Optimize existing or new use cases</li> <li>– Improve use case performance</li> <li>– Increase the speed of outcomes</li> </ul> </li> <li>• Benefit: Our innovative framework helps the Army tackle various use cases with data-driven applications that employ AI/ML for automated and intelligent decision-making.</li> </ul>	

ing

- Cuts cycle time by 80% to expedite delivery to the warfighter faster
- Reduces costs by 50% to accelerate digital transformation initiatives
- Increases operational efficiency by 90% with automated operations

- Benefit: It aligns with the Military's requirement for an agent-based architecture that outlines interactions among agents, smart objects, and human operators, and simplifies management
  - It incorporates data fusion for efficient sensor data processing
  - It can simultaneously manage multiple use cases across locations

Dan Brunk dbrunk@mdefensegroup.com Chief Executive Officer 14342212227	Brandy Foster bfoster@mdefensegroup.com Proposal Manager 19373010990
Web Address	CAGE Code
mdefensegroup.com	1H2F2
Capabilities	
PLATFORM DESIGN & PROTOTYPING Ships, Small Craft, & Unmanned Vehicles Unmanned Amphibious & Ground Vehicles Modeling & Simulation Large-scale Rapid Prototyping & Testing POWER & ENERGY Hybrid & Electric Propulsion for Maritime & Ground Vehicles	

System Modeling & Control Architectures for Electrical Systems  
Green Energy Harvesting & Power Storage  
Smart Power Management Systems  
Cybersecurity for Maritime Vessels, Manufacturing Facilities & Power Grids  
ADVANCED MATERIALS & MANUFACTURING  
Expandable Structures & In tables  
Material Modeling & Structural Analysis  
Design Tools for Additive Manufacturing  
Virtual Experiments for Rapid Design  
Structural Health Monitoring  
Material Concept Prototyping  
AUTONOMY & DATA SCIENCE  
Autonomy Development Unmanned Systems  
Industry 4.0, Digital Twin, & the Industrial Internet of Things  
Certi cation & Trust  
PROTOTYPING & TESTING CAPABILITIES  
Shipyard Facility Pier 24, Honolulu, HI  
Core capabilities include welding (aluminum and steel), machining, FRP laminating, electrical, hydraulics, pneumatics, systems outfitting and rigging.  
Quick access to excellent at-sea testing conditions ranging up to sea-state 4 and shallow to deep water.  
Variety of testing assets available from 17 to 70  
Fabrication Facility South Kingstown, RI  
Custom fabrication of inflatable dropstitch panels and forms.  
Fabrication, assembly, and modification of UUVs.  
Implementation of digital/ mechanical on-board systems, assemblies, and controls.  
Local access to industry- leading Naval and maritime vendors, subcontractors, and testing facilities.  
Waterfront Integration & Test Facility, Portland, ME  
4,800-st climate-controlled electro-mechanical assembly workshop  
Access to world-class repair facilities and 330-ton travel lift.  
Advanced electric motor test lab.  
271 kWh Li-ion battery installation.  
1,000 HP water brake namometer.  
ENGINEERING EXPERTISE & LATEST DESIGN TOOLS  
CFD Analysis  
Finite Element Analysis  
Sea-keeping Analysis  
Mechanical System Design  
Hydro-mechanical Simulation  
Concept Design

### Capabilities

#### ABOUT US:

- Trusted experts in wireless and sensor-based asset identification, tracking, and monitoring solutions and services
- We simplify, streamline, and enhance accuracy in asset management, ensuring a strong Return on Investment (ROI)
- We specialize in IT modernization and Digital Transformation (Dx) solutions and services
- Small Disadvantaged Business (SDB) and SBA Woman-Owned Small Business (WOSB) certified
- Headquartered in the Washington DC metro area
- Over 35 years of experience in enterprise-grade product, solution, and engineering services
- Value-added reseller of industry-leading products and solutions.
- Key personnel awarded patents by the USPTO

#### CAPABILITIES:

- Specialists in Radio Frequency Identification (RFID), Global Positioning Systems (GPS), Bluetooth, Internet of Things (IoT), Machine to Machine (M2M), Terrestrial, 5G, and Satellite technologies.
- IT modernization and Digital Transformation (Dx) solutions and services encompassing inventory, asset, warehouse, logistics, and supply chain management.

- Solution-oriented automated processing leveraging Artificial Intelligence (AI), Machine Learning (ML), and Computer Vision (CV) applications.
- Engineering and Research & Development (R&D) services.
- Expertise in business process mapping and workflow optimization.
- Agile project and product development lifecycle support.

**CERTIFICATIONS:**

- ISO 9001:2015
- ISO 27001:2013
- Certified Scrum Master
- CompTIA RFID A+
- SBA WOSB

**Customers**

Customs and Border Protection (CBP)  
 U.S Navy (NIWC-Pacific, NSWCCD)  
 Department of Justice (DOJ)  
 Government Publishing Office (GPO)  
 In the Private sector we cater to customers in healthcare (Pharma, Medical device manufacturers, hospitals), horticulture, oil & gas, aerospace.

Capabilities					
<p>Expert UAS/eVTOL Consulting: Red Octopus Digital Services LLC is a holistic information technology services and Business Analysis consulting provider targeting organizations that have Small Unmanned Aerial Systems (sUAS) and Electric Vertical Take-Off and Landing Vehicle (eVTOL) portfolios and processes that are out of alignment with their business goals and vision. We analyze the current laws, regulations, policies, organizational structure and operational security; then we proposes various ways to align platforms and sensors to the business mission, where necessary, at a reduced operating cost. Our primary focus is to move organizations from Ad Hoc operations to Program Management; particularly with Fleet Management, Acquisition, Maintenance and Training.</p> <p>As a Service Disabled Veteran Owned Small Business (SDVOSB), Red Octopus is available for non-competitive directed awards to help clients accomplish their most challenging tasks in Agile program management, IT Governance, Risk Management, Compliance, Business Process Re-engineering, Process Improvement, Change Management, Resource Planning, System Training and Stakeholder Communications.</p>

### 395. Seaside Systems, Solutions & Services, Inc.

POC 1	POC 2
Shirley Collins shirley@seasidegroup.us President 703.618.0134	N/A
Web Address	CAGE Code
www.seasidegroup.us	N/A
Capabilities	
Health IT CMIO nurse/clinicians For Oracle financials we offer a licensed CPA. PRODUCTS: The BioDigitalPC 9 family of computers are a business card sized computing platform equipped with the latest Intel CPU, up to 8GB of DDR3 and 128GB of ultra-fast SanDisk SSD per car. It is green by design, the BioDigitalPC 9 is powered by 5VDC and consumes between 5W and	

10W. It uses 90% less power than other comparable systems and requires no chilled cooling. The BioDigitalPC 9 is able to run any x86 operating system including Windows, Windows Server, LINUX, CentOS, RHEL, Ubuntu and many others. The card is hot swappable and contains built in graphics. All BioDigitalPC cards also include the Trusted Platform Module (TPM) for the highest computing security. They have a waterproof, dust proof, fire-resistant and rugged epoxy coating. Ringed with anodized aluminum, the cards are able to resist the worst operating conditions. The BioDigitalPC 9 A, B, C4 and CB are available in commercial and industrial operating temperatures and able to withstand 3,000G (independent 3rd party verified). Multiple cards can be linked via connectors to form a mobile data center in a pelican case. All products are 100% USA made.

OPUS Enhance: is plug-and-play software, that can be integrated or embedded into devices/systems to optimize wireless networks, internet, phone, video and improve performance of your existing bandwidth by a factor of 5.

Capabilities	

Coil Winding  
Contract Manufacturing  
Injection Molding  
Wire Processing

SMT manufactures electromechanical components and assemblies with emphasis on wire harnesses and cables, injection molding, contract manufacturing and coil winding. We have been extremely involved in the HV cable development as well as HVIL cable production. We have a new automated crimp to crimp machine that is capable of automatically processing up to 5,000 wires per hour with a terminal on each end of almost any wire 26-10 AWG. We regularly process from 30 AWG to 500 MCM. We now process 1,000 volt cables for battery packs. We can do both ultrasonic welding and the traditional mechanical crimping methods for terminating cables. We can do complete harnesses both large and small.

Web Address		CAGE Code			
www.capstonemarketplace.org		07069			
Capabilities					
The Capstone Marketplace provides innovative undergraduate engineering design teams, working for two Semesters under supervision of a University Engineering Professor. The CM Coordinators work with the student teams to help guide their progress towards a successful solution, and we provide the \$5000 expense money (sometimes larger) to support prototype development and testing, and reporting of results. We request that the supported DoD entity provide occasional voluntary guidance on matters such as anticipated concept of operations and mid-course design trajectory adjustments.

<b>Capabilities</b>	

The Coalition for Government Procurement is the single most effective voice for commercial service and product companies selling in the federal market. For more than 40 years, the Coalition has brought together public and private sector procurement leaders to work towards the mutual goal of common sense acquisition. Members have access to the latest federal compliance and policy information, which serves as the foundation of a successful government business.

Capabilities	
<p>USSF provides its customers with vertical CDMO services, as well as offers select customer access to its QYNDR oral drug delivery platform.</p> <p>The QYNDR platform was developed to have applications across the globe and has the potential to enable the world's first over the counter vaccine. It is oral liquid, not requiring needles and has no special administration needs. It is stable at high temperatures found in most areas worldwide. Finally,</p>	

it is food-like, so it does not need to be sterile thus making manufacturing much easier. The human clinical results show excellent mucosal results, longevity and cross variant protection.

#### Core Capabilities/Competencies:

- Data Visualization, Management, and Analysis
- Investment Management, IT PMO Support, CPIC
- PMO Office/Function Support
- Budget and Resource Management
- Talent Management and Development, Executive Coaching
- Human-Centered Design and Innovation

#### Differentiators:

Vergys brings a breadth of expertise in management and IT consulting to every client. We have the right tools and experience to develop and implement innovative approaches and solutions to exceed mission requirements today and in the future.

#### Connecting the Dots

Our decade of operational data analysis experience provides unique insights into the challenges and opportunities of evidence-based decision-making. Our knowledge of design improves data usability.

#### Leading Edge Work Products and Solutions

We connect data to people and understand user needs. We apply an iterative, user-centered design approach and industry best practices to client-facing products. We know what information decision-makers need to meet policy and program objectives.

#### Achieving Transformation

Operational excellence is critical. With a “people first” philosophy, we help organizations expand their capabilities and position themselves to better serve citizens.

Web Address	CAGE Code

## Capabilities

1.CDMO specialized in manufacturing of nucleic acid biopharmaceuticals like plasmid DNA, linearized plasmid DNA and mRNA.  
 2. More than 20 years of experience.  
 3. Preclinical to commercial grade plasmid manufacturing, from 10L to 1500L.  
 4.Supplier of plasmid DNA and linearized plasmid DNA as starting material for mRNA synthesis.  
 6. Timeline: plasmid DNA- 1week, linearized plasmid DNA-1.5 weeks, mRNA- 2 weeks. We use the same platform technology across the scales, so our manufacturing timeline remains same.  
 5. Other services include process development and optimization, GMP cell banking and testing, stability and analytical release testing, aseptic GMP fill/finish, CMC support.  
 4.Manufactured several GMP batches(over 310 batches of cGMP plasmid ~3130+ grams) of plasmid DNA for different modalities like CGT applications, vaccines for infectious diseases, cancer etc.  
 5. Largest manufacturing capacity in the market-combined capacity of 4000L.  
 6. Two state-of-the-art facilities covering 160,000 sq. ft. with space of expansion.  
 7. Pilot scale mRNA manufacturing completed, moving to GMP production soon.  
 8. Qualified primary and secondary vendors from USA.  
 9. Provide end-to-end solutions and enable rapid, large-scale manufacturing capacity of plasmid DNA/mRNA to address manufacturing capacity constraints of nucleic acid biopharmaceuticals, address supply chain vulnerabilities of plasmid DNA and linearized plasmid DNA as the starting material of mRNA manufacturing and create rapid-response capacity as Medical Counter Measures for the entire US public health and medical industrial base.
